The following is an examiner's statement of reasons for allowance: The instant invention is drawn to Peg conjugated biphalin or enkephalin. The pegylation resulted in an unexpected result of substantial BBB transport, not taught or suggested in the prior art, especially in light of the fact the created conjugate would be large with respect to size. Further, Sakane et al., "*Carboxyl-directed Pegylation of Brain-derived Neurotrophic Factor Markedly Reduces Systemic Clearance with Minimal Loss of Biologic Activity*" *Pharm Res*," 14(8):1085-1091 (1997) demonstrates that pegylation brain derived neurotrophic factors are not transported across the BBB as compared to other tissues and would essentially be ineffective. Thus, it appears that the peptide(s) in combination with the Peg is the compound that is capable of crossing the BBB, and is not a sole function of the Peg itself.

Conclusion

Claims 1-3, 18, 19, 23, 24, 26, and 27.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
